INTERNSHIP AVAILABILITY

Open to internship opportunities in software development, frontend development, or web development. Preferred location: Toronto, remote, or hybrid.

SUMMARY OF QUALIFICATIONS

- 3rd-year Computer Science student at Toronto Metropolitan University, interested in software development, frontend development, web development, AI, cybersecurity, and data science.
- Developing practical programming skills through university coursework, personal projects, and GitHub-based portfolio work.
- Comfortable working with Java, Python, C, C++, Bash, HTML, CSS, JavaScript, React, Git, GitHub, Firebase, VS Code, and Figma.
- Detail-oriented and consistent learner with strong interest in problem-solving, clean code, and building useful technical projects.

TECHNICAL SKILLS

Programming: Bash, C, C++, Java, Python

Frontend: HTML, CSS, JavaScript, React

Tools: Git, GitHub, Firebase, VS Code, Figma

Interests: Software Engineering, Web Development, AI, Cybersecurity, Data Science

PROJECTS

Astro Explorer | *Java, Java Swing, AWT Graphics, Object-Oriented Programming* | [GitHub](#)

- Developed a 2D Java arcade game where users control a rocket ship, shoot falling asteroids, and track their score in real time.
- Built the game logic and interface, including keyboard controls, asteroid movement, bullet firing, collision detection, score tracking, reset functionality, and starfield toggle.
- Created a playable desktop game with real-time animation, interactive controls, randomly generated asteroids, and a working score system.

Personal Portfolio Website | *HTML, CSS, JavaScript* | [Portfolio](#)

- Built a responsive personal portfolio website to present my education, skills, projects, and internship availability.
- Added light/dark mode, mobile-friendly layout, clean navigation, and simple structure for future updates.

ACADEMIC & PROJECT EXPERIENCE

Computer Science Coursework and Hands-On Learning

Toronto Metropolitan University(Ryerson University)

2022 – Present

Toronto, ON

- Built programming experience through coursework, assignments, personal projects, and independent practice.
- Practiced object-oriented programming, debugging, web development, problem-solving, and project organization.
- Used GitHub to organize and share technical projects while continuing to improve code quality and consistency.

EDUCATION

Toronto Metropolitan University(Ryerson University)

Bachelor of Science, Computer Science

Expected Graduation: 2027

Toronto, ON

- **Relevant Courses:** CPS109, CPS209, CPS393, CPS510, CPS530
